12. Select language and click "Continue".

English (United States) Afrikaans الربية المنزبية الربية الربية

13. Click "Let's go!".

Welcome to WordPress, Before getting started, we need some information on the database. You will need to	
know the following items before proceeding.	
1. Database name	
2. Database username	
3. Database password	
4. Database host	
5. Table prefix (if you want to run more than one WordPress in a single database)	
We're going to use this information to create a wp-config, php file. If for any reason this automatic file creation doesn't work, don't worry. All this does is fill in the database information to a configuration f You may also simply open wp-config-sample.php in a text editor, fill in your information, and save it is the first operation of the same set of the s	ile. as
wp-contig.php. Need more help? We got it.	
In all likelihood, these items were supplied to you by your Web Host. If you don't have this information, then will need to contact them before you can continue. If you're all ready	you
Let's goi	

14. Enter database connection details and click "**Submit**". The information is at <u>Step 9</u>. (Example)

lelow you should ent	er your database connection details. If yo	ou're not sure about these, contact your host.
Database Name	psp_dreamer101	The name of the database you want to use with WordPress.
Jsername	pspdreamers101	Your database username.
assword	9Yj0A_slgTP	Your database password.
Jatabase Host	216.230.240.31	You should be able to get this info from your web host, if localhost doesn't work.
able Prefix	wp_	If you want to run multiple WordPress

Database Name: **[your database name]** Username: **[your username]** Password: **[your password]** Database Host: 216.230.240.31 TablePrefix: **wp_**

15. Click "Run the installation".

All right, sparky! You've made it through this part of the installation. WordPress can no database. If you are ready, time now to Run the installation	ow communicate with your
